Weight:

Euthanasia Justification / Consent

Based on owner report and discussion of quality-of-life considerations, humane euthanasia is elected as the most appropriate option to prevent further suffering. A brief exam confirms significant quality-of-life decline consistent with owner history; specific medical details are not recorded in this document.

The owner or authorized agent has provided verbal informed consent for humane euthanasia of the above-named patient.

Drugs Administered

Ketamine (ml):

Dexmedetomidine (ml):

Butorphanol (ml):

Euthasol (pentobarbital solution) (ml):

Procedure Notes

Premeds were given IM. Patient was in a deep level of sedation. Euthasol given IV. Confirmed passing by thoracic auscultation and absence of corneal reflex.
